MINI INTERVIEW

Q. What is Supervised Learning?

A. Supervised learning is a machine learning algorithm of inferring a function from labeled training data. The training data consists of a set of training examples.

Q. What is Unsupervised Learning?

A. Unsupervised learning is also a type of machine learning algorithm used to find patterns on the set of data given. In this, we don't have any dependent variable or label to predict.

preparation for
tomorrow is
doing your best
today"**

VISION

To become an institution to provide high quality technical education with necessary skills and values to meet the demands of the industry and society.

MISSION

- **To create a close to perfect place for learning process by adopting efficient teaching methodologies and strategies.**
- **To develop a platform for research by supporting innovative ideas for Research and Development based on the needs of the Industry and Society.**
- **To provide career development and higher studies assistance to the student community.**
- **To inculcate the demanded skills for the modern technologies with ethical and human values.**

OBJECTIVE OF THE INSTITUTION

We are always ready to adapt changes in developing the environment to provide quality education for the successful achievement of academics and administration by understanding the requirements of stakeholders.
